

The EPS European Physicists Biographies Project

Editor: Dr. Svetlana Erlykin

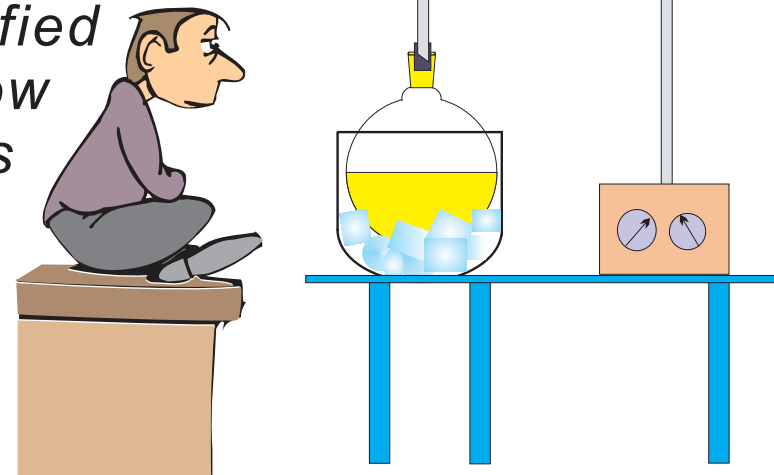

Graphics: Pauline A. Russell
Svetlana Erlykin

The venture is aimed at increasing the interest in physics of 12-17 year old students by way of a brief description of the personal as well as the scientific aspects of those famous physicists, whose names are mentioned in school text books

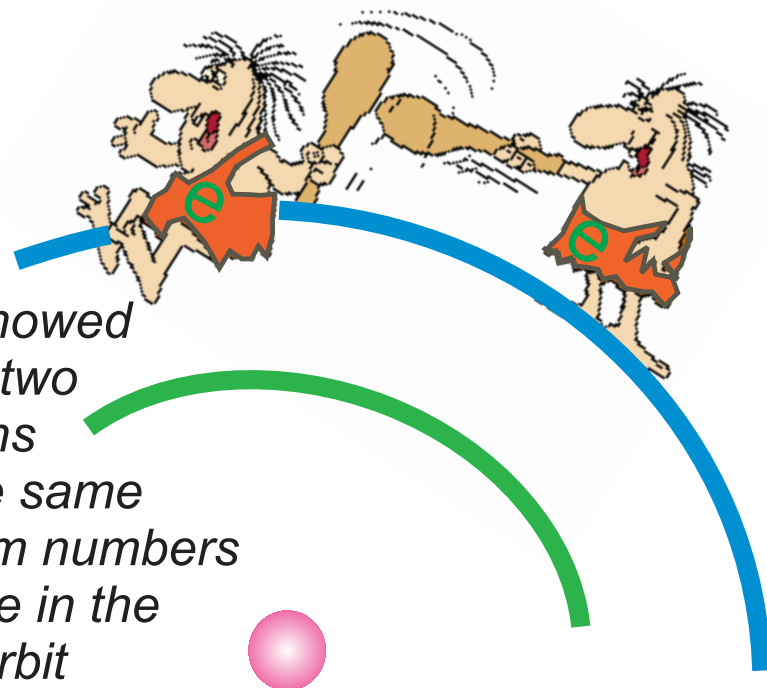

*Laplace developed
game theory*

*Kamerlingh Onnes
studied liquefied
gas at very low
temperatures*

*Pauli showed
that no two
electrons
with the same
quantum numbers
could be in the
same orbit*
